Module CON2120: Multiple Materials - (optional)

Expectations: The student will

1. *Develop a product that incorporates two or more types of materials in its construction.*
2. *Design a product made from two or more dissimilar materials*
3. *Construct a product from two or more materials*

Evaluation

Percentage

Project Development, Planning, Measurement, and Design.	25
Construction & Assembly	35
Finish and Appearance	20
ACP-Attitude, Attendance, cooperation, cleanup, work ethic	20

Lab Clean-up: Each student will also be responsible for an area of lab clean-up. A portion of the student's grade will be dependent on efforts during this time in class.

Digital Citizenship is the appropriate and responsible behaviour with regards to technology use. Digital citizenship should be practiced in every course, throughout the school and at home. It is an ongoing partnership between teachers, students, and parents. Just as teachers build awareness of the importance of digital citizenship at school, parents build and reinforce these concepts at home. Students need to approach any use of technology with the digital citizenship components in mind.
